Health Sciences Literature Review Made Easy (Garrard, Health Sciences Literature Review Made Easy)

Synopsis

Health Sciences Literature Review Made Easy, Fourth Edition is an essential text for your nursing research course and provides students with a solid foundation and the tools they need to evaluate articles and research effectively. The Fourth Edition builds on the digital updates made to the previous edition and highlights the Matrix Method and the skills necessary to critically evaluate articles. The text also covers Method Maps, which teach students how to effectively construct a research study. The author leads students through the process of how to manage a quality literature review in the context of evidence-based practice. A case study highlighting a typical graduate student is woven throughout the text to illustrate the importance of literature reviews and evidence-based practice. Health Sciences Literature Review Made Easy, Fourth Edition is appropriate for graduate level nursing courses as well as undergraduate Nursing Research courses that require literature reviews. Key Features: • Data Visualization: A Digital Exploration is an interactive, online appendix • The Matrix Method teaches the essential skills around literature evaluation • A real-life scenario case study is woven throughout each chapter to reinforce key concepts • Completely updated chapter on the guidelines for Methodological Review • Method Maps are introduced to convey the thought process around designing a research study Online Bonus! Each text purchase includes access to an online supplement for students. The Fourth Edition features a cutting-edge, interactive appendix. This digital exploration of Data Visualization includes new content, podcasts from the author, and supplemental resources such as TED talks. This is a fantastic student resource! Average Customer Review: 4.4 out of 5 stars 42 customer reviews

Best Sellers Rank: #75,948 in Books (See Top 100 in Books) #71 in Books > Reference >

Customer Reviews

This book was super helpful in terms of laying out things you may already do into one cohesive system. Most of the individual pieces are already haphazardly part of my system, but this lays them out as a unified whole with minor additions. I will be putting it into practice from now on.

good book

I think the writing in this book is terrible, but doing a matrix is very helpful in writing a lit review. That's the only part I found useful - you could probably figure that part out without buying the book though.

Excellent text. I used this often when learning about literature reviews for my Master's class. The Matrix method the author describes makes a lot of sense. She gives excellent examples.

Was in great shape. Only minor crease near top corner but does not effect readability in the slightest.

I was a bit hesitant to buy this book because of the cost, but it is worth every penny! Very detailed and informative; a must have!

It's a great resource for systematic and integrative reviews. If you're very new to this type of research, it's easy to read and provides a lot of very helpful and clear strategies for undertaking the project.

This book should be given to every student in social science research it is foundational. I am sure the new one will be even better. I have been a PhD student for the last 3 years and now that I'm focusing more on my research proposal for my dissertation I found this I should have had it in my first year of classes.
