My dad was planning to open a blacksmith shop and my brother bought this book for him. And I can tell that he is satisfied with the information he gets from this book. I also have a chance to read this book and I can tell that this book is really good. This book is a must have for every beginning or intermediate blacksmith. It details the process of blacksmithing from the start till the end, beginning with the building of your own forge to making tools and even some elaborate door knockers. This is all written in a very easy to understand and easy to read style. The only drawback is the way the book looks. It is bound in a rather amateuristic way for a book of this quality. Anyway, this book is worth to read and recommend.
