Customer Reviews

This is great resource for verifying prices. If they are more than 20% different from these numbers, start asking questions. They either made a mistake in their calculations which will bite everyone later or they are guessing which will not be any fun either.

This book breaks it down and makes it easy to quote a project.

We've used this book every year for our small construction business. It really helps in pricing jobs.

Great book. essential for any contractor or handyman looking to properly bid jobs.
