## **Customer Reviews**

NATIONAL GEOGRAPHIC KIDS inspires young adventurers to explore the world through award-winning magazines, books, website, apps, games, toys, television series and events and is the only kids brand with a world-class scientific organization at its core.

I purchased National Geographic Kids Super Space Sticker Activity Book to use with my kids during homeschooling. My 4-year-old daughter loves this workbook. She loves all the stickers and the activities. I like the little snippets of information, which have been supplementing our other reading about space, planets, and the solar system. I only wish that the activities were more related to learning about space than some of the simpler activities like mazes. The aliens are a bit off-putting

too. I do love all the bright colors and pictures, which keep the attention of younger learners. Additionally, my daughter has been enjoying this workbook, which I find to be a nice supplemental resource for my homeschool lessons. Once my daughter finishes all the activities, she can then read the factoids over and over again.

This is an excellent activity book for any child that loves astronomy and is interested in the solar system. My 3 year-old loves space and has been obsessed with this book for the past 2 weeks. It has tons of sticker and even some of the moons of the some of other planets. Where else are you going to find Phobos, Deimos, and Titan stickers? Thinking of buying another!

I bought this incredibly fun sticker activity book for my 5 year old son to play with when we studied a space unit in our CC group. He adores it! We spend too much time in the car, and he's been kept busy with fun activities for hours. It's a touch silly in places, but has good information for space for the younger crowd. I'm looking for more of this series to buy!

This is a super cool book! My kids, ages 3 and 5, absolutely love playing around with it, using the stickers and looking at the great pictures! If you're looking for a really neat book to encourage interest in the solar system, I'd highly recommend! National Geographic really hit it out of the park with this one!

a lot of small stickers, including animals, What the hell animals plants and fruits stickers are doing in super space sticker book???

It was a big hit with my nephew and niece!! I will be buying more of these type books for sure. they are 4 and 7 so big age range and both still loved it.

Got for my 4 yr. old grandson who has a corrugated space capsule and he had asked his Grammy to get him some stickers to decorate inside and this book fit the bill for that request. He loved the book and went thru it coloring and doing activities. Knew I could count on Nat. Geo!!!

My 3 year old son who is so crazy about solar system and space really love it. So much infos, educational, & full of activities keeps him busy for hours, not like other activity books that he could finish in less than an hours. This book is his favorite for a month.
