Guidelines For Cardia Rehabilitation And Secondary Prevention Programs-5th Edition With Web Resource

Synopsis

Guidelines for Cardiac Rehabilitation and Secondary Prevention Programs, Fifth Edition With Web Resource, covers the entire scope of practice for cardiac rehabilitation and secondary prevention (CR/SP) programs. This text was developed by the American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR) and parallels federal guidelines for cardiac rehabilitation programs. It contains information on promoting positive lifestyle behavior patterns, reducing risk factors for disease progression, and lessening the impact of cardiovascular disease on quality of life, morbidity, and mortality. The text has been updated and restructured, providing the most current models for designing and updating rehabilitation programs for patients and preventing second episodes. In addition to chapter revisions, there is new content on behavior modification, risk factors, and special populations. The chapter covering program administration has been completely rewritten to include new regulations and reimbursement standards as well as additional suggestions for new models for CR/SP. The most recent Core Competencies for Cardiac Rehabilitation and Secondary Prevention Professionals and the Core Components of Cardiac Rehabilitation/Secondary Prevention Programs have also been included in their entirety. More than 50 leaders in the field of CR/SP, cardiovascular risk reduction, reimbursement, and public policy have contributed the latest tools and information, enabling cardiac rehabilitation professionals to successfully start new programs or update and enhance existing ones. Key features of the fifth edition include the following:

- A new web resource incorporates 24 questionnaires, charts, consent forms, protocols, records, checklists, and logs from the text that can be used when creating or assessing programs.
- Highlighted guidelines in each chapter cover current issues and provide hints and methods for implementing treatment programs and helping patients stay on track.
- Chapter objectives and summaries help readers quickly assess the topics covered and identify the most important points.

There is strong evidence that participation in outpatient cardiac rehabilitation and secondary prevention programs decreases mortality and recurrent morbidity after a cardiac event. Guidelines for Cardiac Rehabilitation and Secondary Prevention Programs, Fifth Edition, offers procedures for providing patients with low-cost, high-quality programming, moving them toward personal responsibility for disease management and secondary prevention over a lifetime. This is the definitive resource for developing inpatient and outpatient cardiac rehabilitation programs.

Book Information

Paperback: 336 pages

Publisher: Human Kinetics; 5 edition (August 2, 2013)

Language: English

ISBN-10: 1450459633

ISBN-13: 978-1450459631

Customer Reviews

Ã¢ "The 5th edition of the American Association of Cardiovascular and Pulmonary RehabilitationÃ¢ "s Guidelines for Cardiac Rehabilitation and Secondary Prevention Programs is an essential resource for new or established CR/SP programs. The book not only contains information and tools to provide excellent patient care in these settings, but it also addresses many of the barriers and gaps that exist in providing these services to all qualified individuals.Ã¢ "•
--Therapeutic Recreation Journal Ã¢ "This is a welcome update. This book remains a highly dependable source of information for professionals that is easy to read and reference.Ã¢ "•
--DoodyÃ¢ "s Book Review (5 star review)

The American Association of Cardiovascular and Pulmonary Rehabilitation (AACVPR) is the worldwide leader in promoting the value and practice of cardiovascular and pulmonary rehabilitation. AACVPR's mission is improving the quality of life for patients and their families by reducing morbidity, mortality, and disability from cardiovascular and pulmonary diseases through education, prevention, rehabilitation, research, and aggressive disease management.

A layman can use this book to develop programs. Great book!!

If you wanna know how a Cardiac Rehabilitation Program should be, and looking forward to do the certification examination in cardiac rehabilitation, this is the first book that you should buy.

Excellent resources.

Great purchase.

This served as an excellent and primary resource for developing a cardiac care program for rehab professionals (OT/PT).

Very well done. It's very well-organized and easy to use.

Book was in great condition!

Invaluable resource.
