World History Biographies: Isaac Newton: The Scientist Who Changed Everything (National Geographic World History Biographies)

Synopsis

Born in England in 1643, Isaac Newton grew up in the age when Renaissance thinkers were challenging accepted ideas throughout Europe. Fascinated by all earthly science, Newton developed laws of motion and universal gravitation which also furthered our understanding of the movement of celestial bodies. This vibrant biography profiles the famed physicist as an acclaimed mathematician, astronomer, alchemist, philosopher, and inventor as well. Readers will discover the genius who inspired Alexander Pope to write, "Nature and nature's laws lay hid in night; God said 'Let Newton be' and all was light." National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeoed.org/commoncore for more information. From the Hardcover edition.

Customer Reviews

"Featuring extraordinary people throughout history, this series presents information in an easy-to-read, well-organized format." --Library Media Connection

Philip Steele has worked in children's publishing as an author and editor for more than 30 years. He

has written about lands, peoples, cultures, and the natural world. Some of his most prominent titles are biographies of Ho Chi Minh, Jesse Owens, and Rosa Parks. Steele lives in Beaumaris, Wales.

Fantastic book on the life and contributions of Isaac Newton. Although this is written as a children's book it is actually an assignment for my daughter's AP Physics class. It gives a multitude of information on very colorful pages. It is easy to read and understand. Very highly recommend.

I am 8. I think that the book is really good! It tells you facts. Birth and when he died. And lots more.

Easy book for children to understand while covering important topics on the life of Newton

Interesting history

Sir Isaac Newton has always been one of my heroes. This is an excellent book that is interesting and not overly ponderous. Well done.

nice child book

Book was in great condition

Once again, this was bought for my grandsons who are still in elementary school. Science was a major influence in teaching our kids about the world around them and I wanted my grandsons to appreciate it also.
