i wish the songs weren't all transposed to the key of c....some songs just sound better in the key they were written in.

A wonderful book for generation x-ers and anyone else who knows these songs. Perfect for beginning pianists who are just learning chords and chord symbols.

Not only this book, but the entire series of these books. If you are a keyboard player you can change all the keys by using the the key changer for singing in your or someone's key range. All the songs in all the books are all in the key of C. This makes it easy to read and play all the music. If you feel a different cord skins better in a measure then write it. There is lots of space to write thins in. This is awesome for the AARP people because it is easy to read.

Nicely laid out, great collection of songs. Keep in mind that this an "EASY" fake book. That means that many of the songs' chords have been dramatically simplified. Black Hole Sun, as written in this book, sounds terrible. HAHA. But many of the songs are still spot on, and this book is still a lot of fun.

Love this book! Can't wait to work through it! I do wish is was spiral or comb bound.

I like this book, but not as much as I enjoyed the 60s, 70s and 80s versions, mostly because I am not as familiar with these songs. The book itself is just like the other versions. It is very easy to play and sing along right away because of the simple right hand and guitar chords. If you love the 90s, you'll love this book.

Read the description more carefully than I did. These songs are ALL in C - REGARDLESS OF THE KEY OF THE ORIGINAL. Why bother? I could play these songs wrong without a book to tell me how.
