## Customer Reviews

No useful information....at all...I also give it 0 stars!

This book is junk, wished I would have looked at the reviews before I purchased. Can't believe is

letting it be sold on their site.

Ripoff. Mine was 5 pages and 2 were commercials for security systems. WTF.

WTF ..... this is useless, waste of good money

I wish I could give zero stars - no useful and I mean no useful information on knife making - this is signed to advertise another product by hoping you will click links. Even worse it is formatted by third grader so it is hard to read while also containing no information.

There is no information on steel, heat or anything else of any solid value to be found here. It's almost as if the author thought about writing a book; then drafted the forward and scrapped the idea, but published it anyway.

All the bad reviews on this 15-page (allegedly) "volume" made me feel justified in giving it one star--because the cover's kinda cool. A 15-page book? On knifemaking? That insult alone makes me want to take my star back.
