Loved it!! Great quality

Good condition!

Item was just wanted I need and was in excellent condition!!

Perfect brand new condition. Great price!!

I dropped this class...I don't know why the return tab doesn't have the correct information. I no longer need this book and have no idea how to return it early. I would appreciate if someone could direct me in the right direction.

So I never actually opened this book, the code that comes with the book actually gives you access to the online textbook so save your money and buy the code directly from the publisher. This was my first time renting a hardcopy book from . The book I received was brand new and came on time with a valid access code. Overall the book worked great as a laptop stand for the last 3 months, and though the process of renting was hassle free it was a waste of money for myself and I urge whoever is reading this to consider other options if purchasing for a course.

Got the package in the mail today expecting to have MyMathLab and eText as advertised. To my

dismay the code for it was already redeemed! Why does it say Plus MyMathLab with eText in the advertisement title if it's not true?

I ordered this textbook last night and paid extra money for 1-day shipping. I got it in the mail, but the access code that I was given does not work. When I try entering the access code, it tells me the code is invalid...What do I do?
