NATIONAL GEOGRAPHIC KIDS inspires young adventurers to explore the world through award-winning magazines, books, website, apps, games, toys, television series and events and is the only kids brand with a world-class scientific organization at its core.

Very nice quality book. I don't normally buy hard covers unless I am SURE its a classic and can be read/looked at over and over by family and guests (like Shel Silverstein or "Good Night Moon"). This book has vibrant illustrations and pics and seems like it can survive some abuse. When i took it out of the box it felt like it weighed a ton. The paper is its printed on is quality. I'm pretty sure the 11yo is gonna love it (that's the age, right? everything is interesting and they have nonstop questions). I would have got volume 1 first but it was sold out. If this goes over well I will, hopefully, get the first volume for next Xmas.

I love these books. National Geographic has stepped up so much when it comes to educating our little ones. There are so many facts for kids to learn in this book. It is amazing!! My daughter got this and could not put it down. It is wonderful to see he knowledge she has gained from this book. Her teachers are in awe.

This was a gift for my 11yr old granddaughter. She was delighted with the book. The pictures are definitely national geographic quality and the information was written very clear and made interesting to keep a child's interest. Very happy with this purchase.

My family of boys loves fact books. This is a good one. Other national geographic "weird juncture" fact books have random facts throughout. These facts are ORGANISED. 25 facts about a topic, 100 facts about a topic. Very fun!

My nephew remembers facts like there's no tomorrow. This is the second of these books we've bought and he absolutely loves them!! Great diversity in design from page to page, wonderful pictures! Hours of fun!

Although there was plenty of information in the book, the format was disappointing. I think the 8 year old that I bought this for would be very frustrated and overwhelmed by many of the pages with the overload of information. The book was filled, however, with the usual exciting and bright NG pictures, just not easy to absorb. I felt that this might be a book that stays on the shelf.

Purchased this for Christmas for my nine-year-old and it is an interesting book. It is a very big book! My only complaint is the print is very small. This is more appropriate for children at least nine years

or so probably.

Grand daughter loved it. I got her the first one for Christmas and she wanted the second for her birthday in Jan.
