Frederick Bettelheim was a distinguished university research professor at Adelphi University and a visiting scientist at the National Eye Institute. He co-authored seven editions of INTRODUCTION TO GENERAL, ORGANIC, AND BIOCHEMISTRY, ORGANIC CHEMISTRY, and several Laboratory Manuals. He is also the author of EXPERIMENTAL PHYSICAL CHEMISTRY and co-author of numerous monographs and research articles. Professor Bettelheim received his Ph.D. from the University of California, Davis. William H. Brown is emeritus professor of chemistry at Beloit College, where he was twice named Teacher of the Year. His teaching responsibilities include organic chemistry, advanced organic chemistry, and, more recently, special topics in pharmacology and drug synthesis. He received his Ph.D. from Columbia University under the direction of Gilbert Stork and did postdoctoral work at California Institute of Technology and the University of Arizona. He is a coauthor on ORGANIC CHEMISTRY, 10e (Cengage Learning). Mary K. Campbell is Professor Emeritus of chemistry at Mount Holyoke College, where she taught biochemistry, general chemistry, and physical chemistry, as well as advised undergraduates working on biochemical research

projects. Her avid interest in writing led to the publication of many highly successful editions of this textbook. Originally from Philadelphia, Dr. Campbell received her Ph.D. from Indiana University and completed postdoctoral work in biophysical chemistry at Johns Hopkins University. Her areas of interest include researching the physical chemistry of biomolecules, specifically, spectroscopic studies of protein-nucleic acid interactions. She is also coauthor with Shawn Farrell on BIOCHEMISTRY, 7e (Cengage Learning). Shawn O. Farrell, a native of Northern California, received his B.S. in biochemistry from University of California, Davis, studying carbohydrate metabolism. He completed his Ph.D. in biochemistry at Michigan State University, where he focused on the study of fatty acid metabolism. Dr. Farrell became interested in biochemistry while in college, as it was relevant to his passion for bicycle racing. He raced competitively for 15 years and now officiates bicycle races worldwide. He has taught biochemistry lecture and laboratory courses at Colorado State University for 16 years and now works for USCycling. Professor Farrell has written scientific journal articles about specific research projects and about laboratory teaching, as well as articles for sports publications, such as "Salmon, Trout, and Steelheader" magazine. He is co-author with Mary Campbell on BIOCHEMISTRY, 7e (Cengage Learning).

This is an affordable alternative to the book required for my chemistry class. Its basically exactly the same they just changed the cover. All text books usually change the edition of the book and all information in the textbook is the same with minor revisions. If looking for a more affordable option go with the old edition, just ask the instructor if you are required to have any codes for online programs these can usually be purchased through direct site for cheaper. Whether it be McGraw Hill, Prentice Hall, Etc. Trust me doing this saved me over \$800 because the school bookstore over charges for all books and software and usually makes you get new books instead of used even when not necessary

I was disappointed to find that they only include the answers to the questions paired with the example questions and the odd ones at the end of the chapter (of which, the answers are already given in the back of the textbook). BUT, they do show you how to solve it instead of just giving the answer, like that of the textbook which is helpful. It is useful and is cheaper to get online than from school's bookstore.

It seems like the only problems it went in depth on were ones I didn't need the extra help. Not all answers are in here as I expected. I used it to compare my homework answers and make sure I

was on the right track. You will not be able to use it to copy for your homework as there's not enough information. However, it's worth picking up for the price bc every little bit helps.

arrived on time, nicely packaged, and the book is in excellent condition! I bought this book used, hoping for the best, and this book arrived practically brand new.

The solution manual has answers for some of the examples in the chapters as well as answers to the odd numbered problems at the end of each chapter.

I ordered this book because my school listed it as a required item for the class I took. I don't know how good the book is, it never got opened. The hardback book got a little bit of use, but not much. This book is now an official dust collector...and it does that very well.
