This second volume in the Furniture Society's "Furniture Studio" series presents artistic interpretations of tradition in contemporary furniture building. Much more focused on design than practical use or mass production, the society seeks to "advance the art of furniture making by inspiring creativity, promoting excellence, and fostering understanding of this art and its place in society." In an introduction, nine chapters, and an afterword, the book covers such topics as furniture design, designers, and the need for design itself, illustrated by work details and photographs. The designers discuss materials as well as delight in the chances taken by the builders. Like Volume 1 (The Heart of the Functional Arts), this work provides a useful discussion of areas of overlap in design and practical use. It is, however, a specialized offering that will probably be of greater interest to art students and aficionados than to more practical furniture makers. Alex

The furniture society annuals are worth studying by anyone interested in furniture

Finally, a book about IDEAS in furniture! Not how to set up your router, or how to build a colonial spice rack. This book, and its predecessor, "Furniture Studio: The Heart of the Functional Arts," reveals the issues that drive furniture makers. It is also full of great images of contemporary hand-made furniture.
