Climate Change (The Ladybird Expert Series)

Synopsis

This climate change primer explains the history, dangers and challenges of global warming and explores possible solutions with which to reduce its impact. You'll learn about the causes and consequences of climate disruption; heatwaves, floods and other extreme weather; disappearing wildlife; acid oceans; the benefits of limiting warming; sustainable farming, new clean technologies and the circular economy. For an adult readership, the Ladybird Expert series is produced in the same iconic small hardback format pioneered by the original Ladybirds. Each book features the first new illustrations produced in the original Ladybird style for nearly 40 years. Written by the leading lights and most outstanding communicators in their fields, the Ladybird Expert books provide clear, accessible and authoritative introductions to subjects drawn from science, history and culture.

HRH The Prince of Wales has been an environmental leader for over 40 years, working with businesses, charities, governments and others to help promote sustainable ways of living and working. In October 2007 he set up the Prince's Rainforests Project, and in 2010 his International Sustainability Unit was established to facilitate consensus on key environmental challenges. Dr. Tony Juniper is an independent environmentalist and writer. He is a fellow of the University of Cambridge Institute for Sustainability Leadership and the President of the Royal Society of Wildlife Trusts. Dr. Emily Shuckburgh, OBE, is a climate scientist at the British Antarctic Survey. She holds a number of positions at the University of Cambridge and is a fellow of the Royal

Meteorological Society.

The best clear, concise, comprehensive, short (60 pages) brief on climate change and related issues. Non activist, non political, un-hysterical. Just the facts everyone needs to know for resilience planning and detecting political, fossil fuel industry, and Murdoch misinformation and lies. Great gift (especially on Kindle), for children, 10 years old and above.

Excellent summary of the evidence for climate change and the action required to mitigate the impacts. Very easy and enjoyable to read with accompanying illustrations.
