Customer Reviews

Lonnie Bird, a professional woodworker specializing in period furniture, runs a woodworking school in Dandridge, Tennessee. Jeff Jewitt is a professional finisher and refinisher in Cleveland, Ohio and a contributing editor to "Fine Woodworking," Thomas Lie-Nielsen is the founder and owner of Lie-Nielsen Toolworks which manufactures high quality handtools. He lives in Warren, Maine. Andy Rae, from Asheville, North Carolina, is a professional woodworker who writes frequently for woodworking magazines and teaches woodworking. Gary Rogowski, a contributing to "Fine Woodworking," operates his own school, the Northwest Furniture Studio, in Portland Oregon.

I am familiar with woodworking, as I worked on the business side of it. I wanted to start making furniture and I can't afford Mr. Bird's highly recommended classes...so I bought this book. He shows

exactly how to position the tools, secure your workpiece and get an amazing result first time out.
Thank you, thank you, Lonnie Bird !!

Good instructions, clear and concise. Good illustrations. Every wood work should have one in their shop.

Lonnie presents the subject professionally. Taunton did good as usual. Great value.

as advertised

Publications by Lonnie Bird are always excellent and informative to woodworkers, and this one achieves the same high level. I am enjoying reading Illustrated Guide to Using Woodworking Tools and looking forward to more time in the workshop with this publication.

Overall this book is very well illustrated, it contains information on some tools and put an emphasis on hand tools. The book is basically a catalog of the different tools and the basic techniques to use them. I was expecting to at least have some discussions on how to set them up, and care for them. I was also hoping to find more detail discussion on how to choose a power tool (other than you can find some great bargain on used items). There is a small section on sharpening but I guess you need to buy the book dedicated to the subject to go anywhere.

This is a good book. However, Lonnie Bird writes not as clear as Gary Rogowski, Andy Ray or especially Kelly Mehler. This is also applied to his "Band saw" book. There is no clear analysis of cons and pros of different tools. Use of the tools does not contain alternative approaches too. He really thinks that only high end equipment is useful.

los libros de Taunton son muy buenos en general y de una calidad gráfica fuera de serie. En temas de woodworking aquí en España a en libros estamos muy por debajo y una guía como esta es una ayuda extraordinaria. lo recomiendo y deseo que se publique una version en español para los que nos cuesta lidiar con el inglés. Muy bueno el envío aunque no tenemos las ventajas de los USA. Enhorabuena al distribuidor por el servicio.
