I would actually give a 4.5, but it's a close 5. (Hopefully the same goes for my score! Ha!) The only problem is that there's an extra amount of information on some of the flashcards, and that could be advantageous if you read this two weeks, but, when you're cramming everything in the night before the actual AP exam, it's kind of a handful. For example, you could have the simplest word like agriculture, the flashcards would give the most complicated definition with examples that can be pretty hard to grasp (well, when you're scanning it). There is a total of around 420+ flashcards, and most of them are relevant for the exam. I really do recommend getting this as it actually does help. In fact, if you have a hard time sticking your nose in a book, much like me, you NEED to get this since it's basically everything from the Barron's AP book. The flashcards personally helped me for this year's AP exam. I'm usually a last minute studier, so studying half the flashcards two day before the exam and the other half the night before helped me in memorizing important topics along with examples, which is GREAT for when writing the free responses. (I also recommend in getting the Princeton AP Human Geo book, it's easy to read, if you actually open it, and has a more casual style to it as they would add funny titles, probably to ensure that you continue reading.)

These were a huge help to my daughter. She was making C's on tests in her AP Human Geography class and after the first test studying with these, she made a 95%. They're great at helping kids, especially those new to AP courses, organize their studying. I'll never let her tackle another AP class without them.

Our son did not take the AP Human Geo class. He took four other AP classes and tests his junior year and only studied for the AP Human Geo test using these flash cards. He got a 5 (perfect score), and all the colleges we've checked will accept that for college credit.

These cards are no substitute for kids making their own. The problem is how generic they are with their expectations. It might list an idea, but students have no idea exactly what aspects the cards would expect them to cover compared to their teacher or text.

I bought these flash cards to replace the exact same cards that my oldest son used when he was in 9th grade. Unfortunately, one of my current 9th graders had some of the cards in her backpack and they got wet. These are great to review on the bus or whenever they have a few extra moments. We

liked them the first time, so I didn't hesitate to purchase them again.

Excellent study aid for the AP exam. I could of used these throughout the course to assist with the class. Questions are excellent prep for the exam. Many of the questions are almost word for word. I have heard this is the best edition of these cards regardless of the date you are taking the test. Easy to use. I used to study with a friend. Comes with a ring. I got a 5 on the exam. If interested in purchasing, contact me. Mine are in new condition.

These were good but our son wouldn't use them. He said it was difficult to find the cards that went with what he was studying at the time. He liked the book better.

Not so user friendly.
