5th Grade Super Math Success: Activities, Exercises, And Tips To Help Catch Up, Keep Up, And Get Ahead (Sylvan Math Super Workbooks)

Synopsis

Success in math requires children to make connections between the real world and math concepts in order to solve problems. Extra practice can help young problem solvers advance to more complex topics with confidence. The activities in this workbook are designed to help your children catch up, keep up, and get ahead. Best of all, they'll have lots of fun doing it! Some of the great features you'll find inside are:

- **BASIC MATH Tic-Tac-Toe** A twist on this classic game helps students develop a solid understanding of factors, prime numbers, and composite numbers.
- **Dueling Denominators** Students gain practice determining the lowest common denominator between fractions and then adding them.
- **MATH GAMES & PUZZLES** Secret Meeting Professor Wormhole, a genius scientist, wants to meet in a secret location. Students must substitute numbers for letters using a code and multiplication skills to find the secret meeting place.
- **Awesome Avatars** A new video game lets you design your character before you start playing. With choices such as skin color, hairstyles, outfits, and shoes, students determine how many characters can be designed.
- **MATH IN ACTION** Cool Collections Students use multidigit division to find out the number of album pages needed to hold collections of baseball cards, photographs, and stamps.
- **Graph It** Students survey friends about books they've read in the past month and use their graph skills to plot the answers. Then they determine the range, median, mode, and mean of their results.
- **Give your child's confidence in math a boost** with 5th Grade Super Math Success.

Book Information

Series: Sylvan Math Super Workbooks

Paperback: 320 pages

Publisher: Sylvan Learning Publishing; 1 edition (July 6, 2010)

Language: English

ISBN-10: 0307479218

ISBN-13: 978-0307479211

Product Dimensions: 8.5 x 0.8 x 10.9 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

Customer Reviews

Sylvan Learning is the premier provider of tutoring services for grades pre-K to 12 in North America. With over 850 locations in the United States and Canada, Sylvan provides individualized tutoring services, both in centers and online, in subjects including math, language arts, writing, study skills, and more. Sylvan's proven process and personalized methods have helped more than two million students unlock their academic potential. With products based on solid and scientific research, Sylvan is committed to both quality education and to helping children discover a love of learning!

I have used this with older students that have disabilities that are often not exposed to a wide range of math skills beyond basic counting, calculations, basic clock reading, and basic money skills. This whole series is an amazing tool to help them get the spectrum of math skills with a beautifully colorful presentation and an absolutely elegant progression of exercises meant to train any students' mind to gain all the math skills at a conceptual level. The kids love it! kids working with other materials beg and pester me to have a Sylvan Book. Students don't want to go out and do other activities because they so enjoy working with their math book! I recommend this book for any person learning this level of math.

I love the way this math book is broken into 3 sections for learning, fun, and practical application. It is simple to use, easy to understand, and can be fun if your child is inclined to enjoy school. (My kids tend to see math as some sort of torture perpetuated upon them by a cruel and unfeeling adult world, lol.)

Great book to keep your child sharp on math during the summer. Bought for the summer between 4th and 5th grade and my daughter did a few pages every day.

Bought this for my daughter to use during the summer between 4th and 5th grade. She loves working on work books, and this has helped her tremendously with her math skills.

My son really enjoys these books, but we have noticed a couple issues. Like some of the pictures

are so small we have to use our cellphone to zoom in to see which coin it is..

I bought the 5th and 1st grade Super Math for both my grandchildren. I find these books provide excellent material but need directions to do problems. I would prefer the answer key to be placed at the end of the book.

I bought this book for my Son for summer school and he loves it. It's easy and self taught. My son spends lots of time and seems to enjoy learning this way.... Homeschool may be better for my son My son has even talked with me about it. ADHD plays a major role in helping to determine if this type of education is a better learning activity then school. This will offer my son the ability to get away from the bullying because he's so hyper and difficult at times because he's board.

Covers everything a fifth grader needs to know.
