# Yellowstone And Grand Teton National Parks [Map Pack Bundle] (National Geographic Trails Illustrated Map)

## Synopsis

Waterproof Tear-Resistant Travel MapYellowstone National Park was the world's first national park and covers 3,500 square miles. Just to the south of Yellowstone, are the jagged peaks of Grand Teton National Park. The Map Pack Bundle includes maps of both of these iconic parks. Each park has its own character with Yellowstone's mighty falls, massive lake and dramatic geisers. Not to be overlooked, the Teton Range of Grand Teton National Park juts almost vertically from Jackson Lake. The two maps in the Map Pack cover the many thousands of square miles and show popular tourist destinations as well as the deep backcountry where only the hardcore backpacker will be seen. The maps include detailed trail networks with points of interest such as campgrounds, boat ramps, ski areas, and many more. Buy the Map Pack and save 15%! The Yellowstone and Grand Teton National Parks Map Pack includes: Map 201 :: Yellowstone National Park Map 202 :: Grand Teton National Park Every Trails Illustrated map is printed on "Backcountry Tough" waterproof, tear-resistant paper. A full UTM grid is printed on the map to aid with GPS navigation. Map Scale = 1:126,720 & 1:80,000 Sheet Size = 37.75" x 25" Folded Size = 4.25" x 9.25"

## Book Information

Series: National Geographic Trails Illustrated Map

Map: 4 pages

Publisher: National Geographic Maps; 2010 edition (May 19, 2010)

Language: English

ISBN-10: 1597754005

ISBN-13: 978-1597754002

Product Dimensions: 4.2 x 0.2 x 9.2 inches

Shipping Weight: 6.4 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars 47 customer reviews

Best Sellers Rank: #50,571 in Books (See Top 100 in Books) #6 in Books > Travel > United States > Wyoming > Yellowstone #58 in Books > Travel > United States > West > Mountain #78 in Books > Reference > Atlases & Maps > United States

## Customer Reviews

Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the

world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

I purchased this map set for our up and coming trip to Yellowstone and the Tetons. The first thing I want to say is that the map for Yellowstone is NOT the real detailed one like the Teton one is. I was not aware of this at the time of purchase. The maps included are 201 (Yellowstone) and 202 (Grand Teton). National geographic also offers Yellowstone maps for the Southwest region (302), Northwest (303), Northeast (304) and Southeast (305) in a more detailed version. That said the 201 map is still really nice it may not be as easy to read for shorter hiking trails. It is a really big park so it requires having 4 separate maps for more detail. The map is made out of a really nice material or it has a coating on it that makes it waterproof and still nice pliable. If you're planning to write on it I would suggest a sharpie and a highlighter doesn't seam to stick to it. I would also recomend to get the National Geographic guide books to go with it. I got a different brand so the trail numbers don't match up. Once I get back I'll update on how well the worked.

This map pack contains the Grand Teton map and the Yellowstone map. The Grand Teton map has one side with a map of the whole park in somewhat less detail, and on the other side a more detailed map of only part of the park. The Yellowstone map has about half the park on one side and the other ~half on the other side. Map material is of the highest quality I have seen so far. One disadvantage we have encountered is that backcountry camping sites in the Grand Teton map are marked very vaguely/inaccurately. Backcountry camping in the Tetons is allowed in regions highlighted in pink on the map and marked by signs on the trail at the beginning and end of the allowed region. Each region can be several miles long. However, in many cases the vast majority of that region is practically impossible to camp in, and actual campsites are usually signposted. In addition to the pink color of each camping region, each region on the map also includes one or two campsites that are specifically marked by a tent inside the pink region. However, in many cases there is no correlation between the tent mark on the map and the camping sites in reality. Considering that each region is often several miles long, that makes it very hard to plan walking distances and times to camp. It would be best if map editors either removed these tent marks altogether, or, ideally, mark on the map the true locations of actual camping sites in correlation to their location on ground. Otherwise these are high quality maps.

I ordered these maps to help with trip planning. PROS: Two pack, so you get a little price break. Made

of tougher water resistant paper, so they are stronger than a paper mapHave some trails and mileages listedShow different features of the parkCons:None at this time

Very useful for our hiking trips to Yellowstone and Grand Teton. If you want to do a lot of hiking in Yellowstone I would recommend getting the more detailed maps for Yellowstone (made up of 4 maps instead of 1). I bought that pack at a gift shop in Yellowstone for a reasonable price. They provide much more detail then you can get on one map for the entire park.

These maps are really pretty good. Printed on something that feels like plastic or coated paper. I got mine wet on a hike in Colorado and didn't even affect it a bit. Great for day planning.

Ordered these maps before our upcoming trip to Yellowstone and Grand Tetons, as I am a planner. These have a plastic coating making it possible to place stickers for stops I want to make, different colors for scenery or wildlife.

These are excellent maps. National Geographic has always done a good job presenting the trail details within the topo map. The maps are also nice because they shed water.

Great detail, water proof and tear resistant. Just wish it had mileage on the trails. All my other Nat Geo maps do
