The Lost Earth (Lost Starship Series Book 7)

Synopsis

It finally happened. Commander Thrax Ti lx created a hyper-spatial tube for the Swarm Imperium. Across thousands of light-years, a vast armada of warships is heading for Earth to burn the homeworld down to its bedrock as the Swarm begins its genocidal campaign against the human race. No one – not the New Men, the Spacers, the Wahhabi Caliphate or Star Watch – has faced such staggering odds. Alone or united, it makes no difference. Captain Maddox has a last-ditch plan. He's returning to the null region of last voyage to grab the ancient Destroyers hidden there. But an immortal entity of evil cunning haunts the vessels. If it escapes its prison – Maddox will have made things infinitely worse. This time, mankind needs a miracle. THE LOST EARTH is the seventh book in the LOST STARSHIP SERIES.

Customer Reviews

Absolutely one of the very best science fiction novels I have ever read. The old masters of sci-fi could not have done any better. The author has unique plots and interactions between a great variety of aliens and throughout hints at an even greater power that controls the universe . I hope

this is not the end of this series . In my opinion Heppner is the current "master"

As I had hoped the lost earth was another great read. I truly have enjoyed every book in the series and pray it continues. As usual the twists and turns keep you riveted. I find it hard to put these books down. Often I read myself into seclusion which in turn drags you into the world of the book you are reading.

Followed this from book one. Great reads but book five leaves many loose ends and all indications are this is the end of the series. I give this book a five star rating but what is next? Let's hope there is more and Maddox matures in his mode of thinking and actions. Thrax and, No doubt Ural will be a key component.

That was a great, epic battle. Maddox saves the human race, but sets up a new story line with the New Men. This continues to be a fast paced , evolving , hard to put down story.... Thanks for that! Can't wait for the next challenge for Maddox's " family".

Captain Maddox and his crew fight for themselves and the whole human race. This book blends all the previous stories into a race.....to save our race! Historic evil....the Swarm....family and friends.....regrets and joys.....all wrapped up in an epic climax. Read it.....and desire more!!!!!!

I found myself unable to put this book down. At every turn I was kept in suspense, and locked myself away for hours on end reading busily away dying to know what would happen next. The writing and theories are so imaginative. The way the author wrote Thrax's character as disillusioned with the Swarm, and how Swarm society works was surreal, as was the concept of the otherworldly ska creature. I really love this series, and hope there will be many more books to come.

The story only gets better. Keep it going. For first time Heppner readers, you will become addicted to his story telling. Absolutely love it. This chapter of the lost starship crew had everything you need to lose yourself in the story.

Book 7 in this saga didn't disappoint, I rate books on the entertainment they provide me alone. When you've read as many books of this genre as I have, little seems new or revolutionary to me so I rather concentrate on the characters and plot Ark. This book and series satisfies those

requirements.
